## Sealed Bending Beam Stainless Steel Load Cells

- **10 to 200 kg capacities**
- **Excellent price-to-performance ratio**
- **Proven bending beam design**
- **Stainless steel construction**
- **NTEP or OIML certified** (CB6-10KG is not NTEP)
- **Environmentally protected to IP68**

The CB6 is a high performance, sealed bending beam load cell for use in low profile platforms, flexure bases, hanging scales, scale conversions, hopper and packaging scales, and a variety of other medical, industrial, and process weighing applications.

The CB6 is easy to install and use and is interchangeable with most other load cells of its type. Stainless steel construction and welded bellows seals are critical components making the CB6 ideally suited for use in harsh and corrosive environments and where routine washdowns occur.
